Don't Get Caught Off Guard

Avoid an interruption in processing! All legacy lodging terminals in the market today will retire this year, so if yours breaks down you may be unable to process transactions or even get technical support.

Plus, your guests are increasingly paying with EMV chip cards, but chances are the payment terminal you are using can't be upgraded to read this more secure technology, which means you're responsible for the costs of most chargebacks initiated by customers that have EMV cards.

Built with You in Mind

Our compact and easy-to-use device features a full-color touchscreen display, built-in printer, lock-tight security features and everything needed to process EMV chip cards, mag-stripe cards and digital wallets like Apple Pay and Android Pay.

With our EMV-certified terminal, you can:

- Set up folios
- Take deposits
- Track/add charges
- Process quick-stay transactions compliant with card brand rules.

Count on Us

ProcessPoint exceeds client expectations by providing honest and expert advice, unique products and superior service. We promise that you will immediately—and always—save money when processing with us.

We proudly stand behind our Triple Guarantee Program™:

SAVINGS GUARANTEE:

Within your first 90 days of processing, we will perform an audit and ensure your savings are in line with our projections.

PRICE LOCK GUARANTEE:

We guarantee to never raise our processor fees as quoted in your Merchant Agreement.

PRICE MATCH GUARANTEE:

We will match any written competitor's effective rate.
